

THE EROAD TO ELD

A cost effective, comprehensive and easy-to-use hours of service (HOS) compliance solution from your transport technology partner.

OVERVIEW

Your decision about an ELD will affect most parts of your business during the next 24 months. When choosing the right provider it is important to also consider what additional tools and benefits they can deliver to your business.

We invite you to consider a company that has a track record of providing regulator approved solutions across multiple jurisdictions. Our Weight-Mile tax solution has received an independent unqualified opinion by the Oregon Secretary of State Audit Division. Our New Zealand business provides customers with a regulator approved Electronic Logbook. EROAD can also deliver a range of benefits to your business beyond ELD including simplified tax management and improved commercial outcomes.

EROAD is developing an ELD solution in line with the draft FMCSA rule. Once the final rule is published, we will make any necessary refinements, and complete the actions required to become a registered ELD provider.

Take the first step on the EROAD to ELD by installing the EROAD Ehubo hardware in your fleet.

You can have confidence that choosing EROAD is a safe decision.

Understanding ELD

ELD: Electronic Logging Device

HOS: Hours of Service

ELS: Electronic Logging System (driver interface)

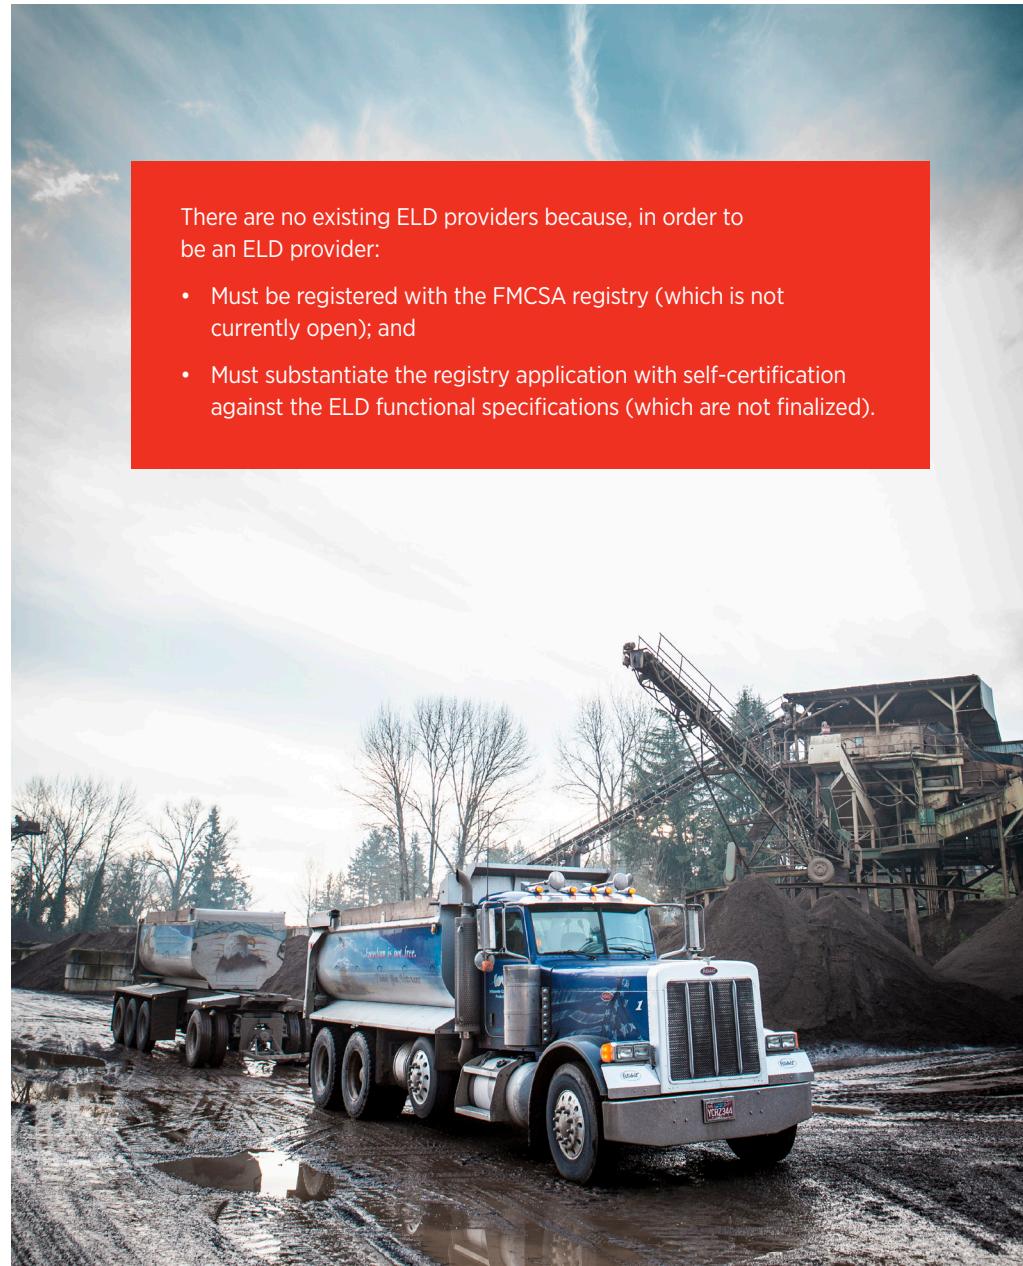

For EROAD's guide to HOS and the ELD mandate visit www.eroad.com/ELD

KEY DATES

- **MARCH 28, 2014**
Proposed rule for ELD mandate published by FMCSA
- **Q4, 2015**
Final rule for ELD mandate expected to be published by FMCSA
- **+30 DAYS 2015**
“**Effective Date**”
ELD providers with compliant product can register with FMCSA
- **+2 YEARS**
“**Compliance Date**”
ELD becomes mandatory
- **+4 YEARS**
End of old technology grandfathering
All drivers and motor carriers must abandon AOBRS and use ELD

There are no existing ELD providers because, in order to be an ELD provider:

- Must be registered with the FMCSA registry (which is not currently open); and
- Must substantiate the registry application with self-certification against the ELD functional specifications (which are not finalized).

BENEFITS

EASY AND SECURE

The driver application electronically captures, annotates and certifies driver logbook records using a secure login.

AVOID ACCIDENTAL NON-COMPLIANCE

Automatic visual and audible alerts help drivers avoid accidental non-compliance with HOS rules.

ENFORCEMENT FRIENDLY

Generates graph grid of driver daily status changes and display of last rolling 8 duty days for roadside inspections.

STAY IN CONTROL

Supports driver and carrier edits, with robust versioning controls meaning logbook errors can be easily corrected and confirmed.

CONFIDENT COMPLIANCE

The Ehubo's internal and external controls detect malfunctions, tampering and data inconsistencies. Driver records are securely stored in EROAD's secure web platform (Depot) to meet privacy and record keeping requirements.

ADMINISTRATIVE EXCELLENCE

In-house visibility of driver HOS status helps you more effectively manage your fleet, allocate jobs and manage dispatch.

REDUCED CSA SCORES

Better HOS compliance helps improve your CSA score, noting five of the top 10 driver violations in 2014 involved HOS and logbook record keeping.

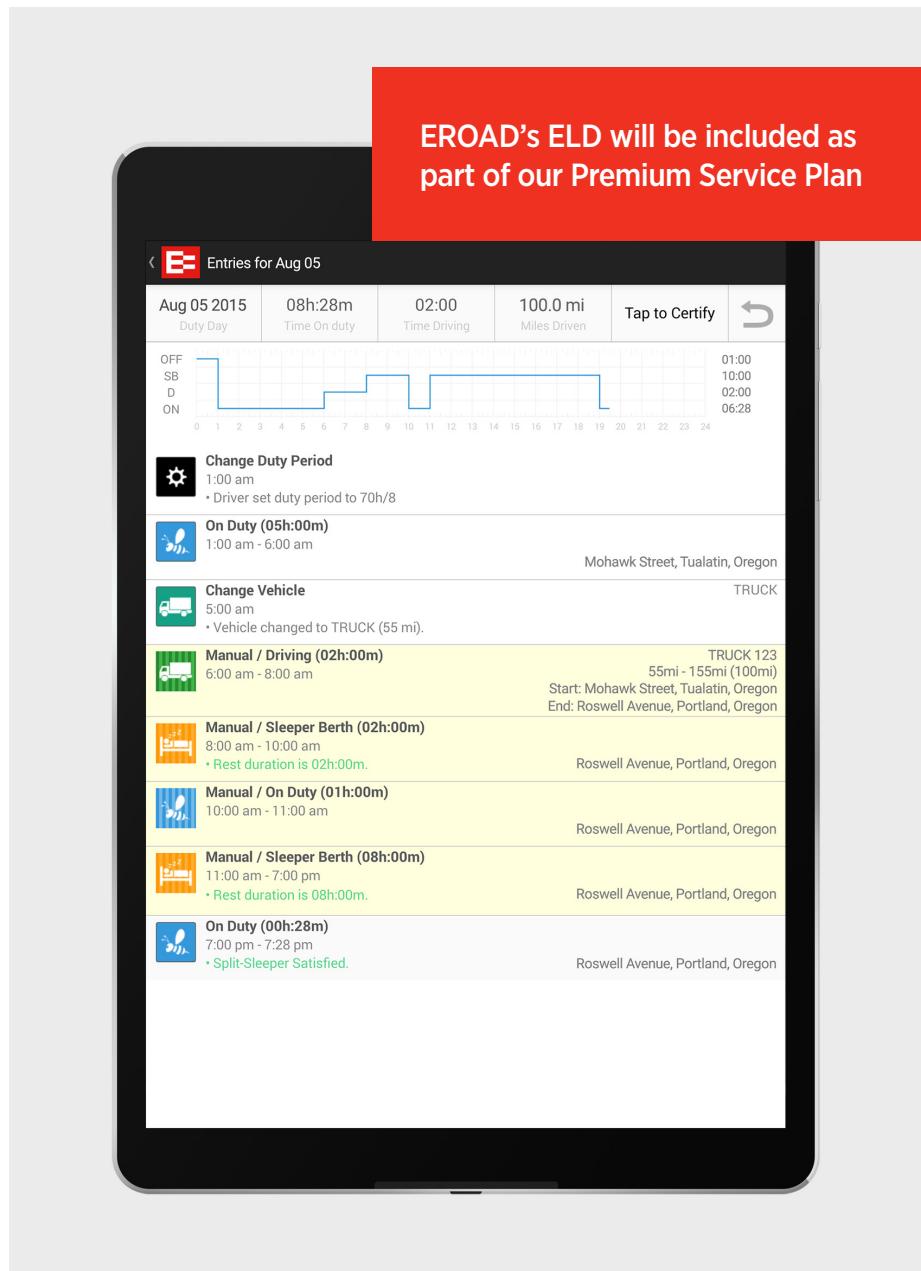

HAPPIER DRIVERS

Easy-to-use application for drivers that can support driver reward and incentive programs.

THE PLATFORM YOU CAN TRUST

From ELS software to ELD hardware, EROAD manufactures, develops and controls every part of the HOS solution.

EROAD's ELD will be included as part of our Premium Service Plan

YOUR COMPLETE TECHNOLOGY PARTNER

By choosing EROAD as your technology partner, you will gain much more than an ELD solution. We offer a powerful set of tools to help you manage your business.

TAX MANAGEMENT

Automated WMT and IFTA fuel tax reporting means you can ditch the spreadsheets and rely on automated calculation of your tax obligations state by state. The EROAD system automatically calculates taxable and non-taxable mileage, fuel usage and vehicle configuration and provides electronic reporting for your tax returns.

IMPROVE FLEET MAINTENANCE

EROAD's service and maintenance module gives you complete control over maintenance scheduling so you can ensure your vehicles are always in good health. Record keeping and archiving is easy, and online, meaning you have less paper and administrative work.

OPTIMIZE VEHICLE UTILIZATION

Increase your profitability by getting optimal running time out of your vehicles. Reduce or eliminate lost productivity by monitoring time on customer sites, at your base or on supplier sites.

OPERATIONAL EXCELLENCE

More effective dispatch and day-to-day management of your vehicles and jobs. Improve route planning using traffic and truck map layers to avoid heavy traffic or unsuitable roads.

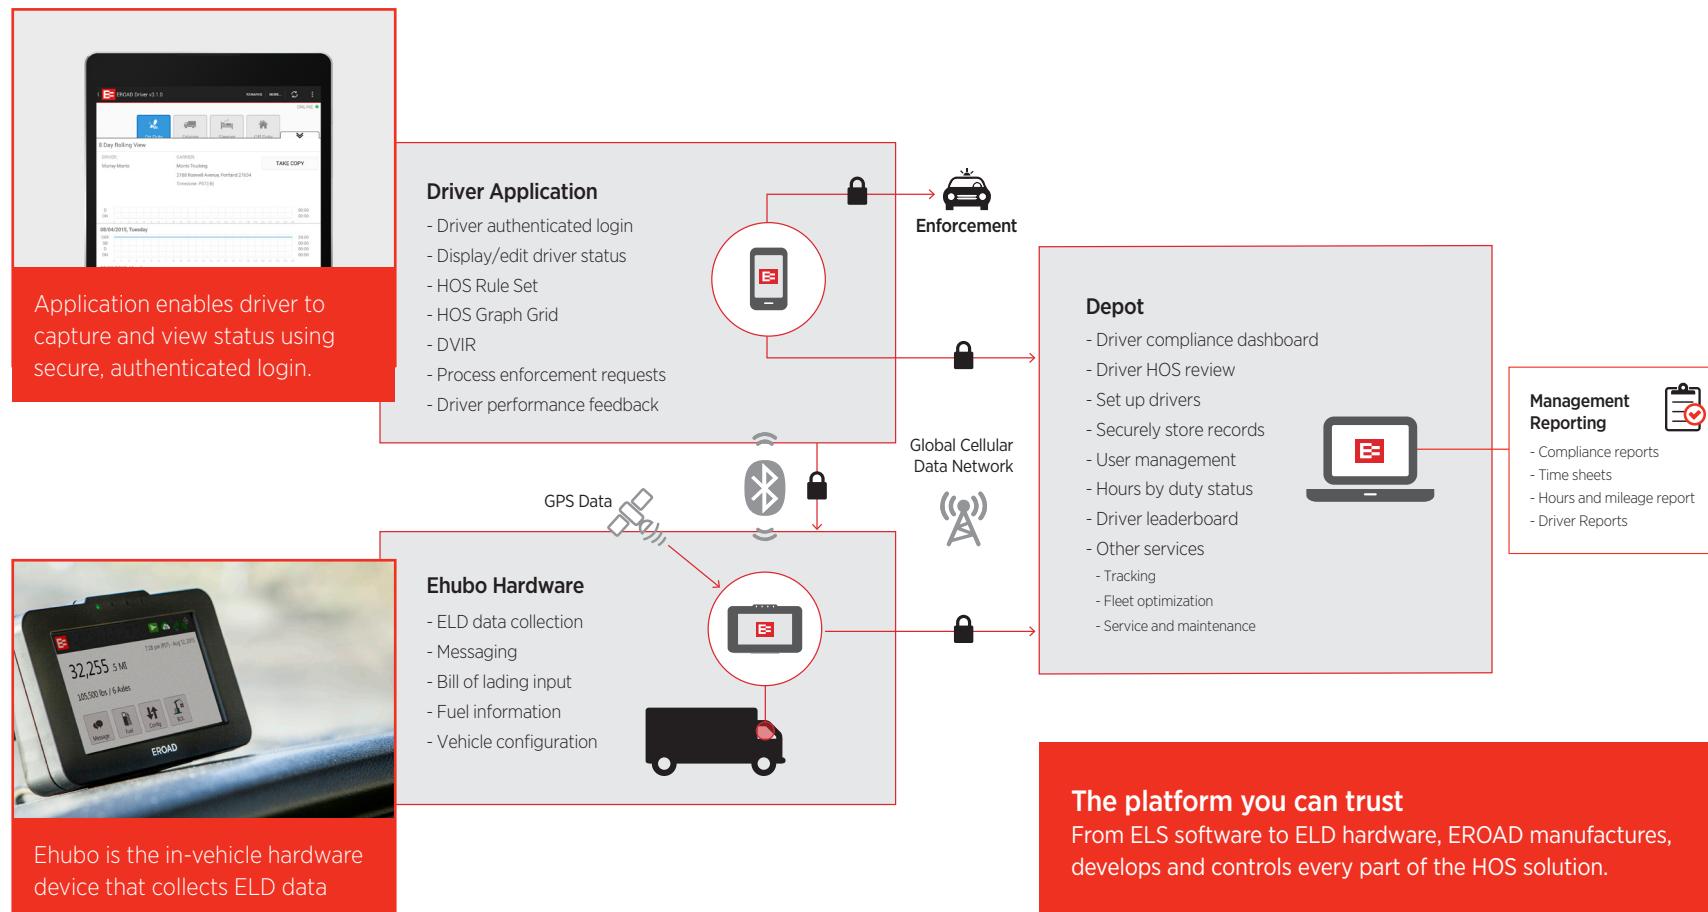

EXCEPTIONAL EXPERIENCE

We back up our services with comprehensive customer care and support. We provide local, in person service supported by an Oregon based customer care and technical support team.

EROAD is committed to a partnership to support your successful transition to electronic logbooks.

EROAD ELD ARCHITECTURE

EROAD's ELD¹ solution will leverage our advanced Ehubo in-vehicle hardware, combined with our driver friendly mobile device based ELS and secure web-based Depot application.

Your driver will use the mobile device to capture and view driver status using a secure authenticated login. The Ehubo will be integrally synchronized with your trucks to capture engine power, vehicle motion,

miles driven, engine on hours, location and state line crossings. The required data is transferred to the ELS application using a secure wireless connection.

Depot provides secure record keeping and visibility of HOS status in-house to assist in dispatch planning.

¹ Subject to the final ELD rule and specification, and any subsequent development work to meet the FMCSA certification requirements.

A PLATFORM YOU CAN TRUST

EROAD has set the standard as the first GPS provider to offer a government-approved electronic highway tax solution. To achieve this we built an entirely new kind of technology platform to support the commercial transport sector – designed from the ground up to meet the highest performance, financial and security standards.

EROAD's advanced technology delivers electronic tax, compliance and commercial services. This provides you with the tools you need to fine-tune your business and achieve your business goals. With EROAD you have confidence that your technology provider is able to meet all your business requirements, both now and in the future.

Unlike many vendors, EROAD can support ELD installations in all manufacturers and any age and model truck.
